## "I Can" Do Math

(Ratios \& Proportional Relationships)
I can examine how one item relates to another and use this information to solve problems.
$\square$ 7.RP.A. 1 I can calculate the unit rate for real life situations by breaking down the ratio (fractions) by dividing to solve the problem to find the relationship between two units.
$\square$ 7.RP.A. 2 I can recognize and represent a proportion as a statement of equality between two ratios.
$\square$ 7.RP.A. 2 A I can analyze two ratios to determine if they are proportional to one another with a variety of strategies (ex: using tables, graphs or pictures).
$\square$ 7.RP.A.2B I can define constant of proportionality as a unit rate.
$\square$ 7.RP.A.2B I can analyze tables, graphs, equations, diagrams and verbal descriptions to identify unit rate.
$\square$ 7.RP.A.2C I can represent proportional relationships by writing equations.
$\square$ 7.RP.A.2D I can explain what the points on a graph of a proportional relationship mean in terms of a specific situation and recognize what $(0,0)$ and $(1, r)$ on a graph represents, where $r$ is the unit rate.
$\square$ 7.RP.A. 3 I can apply proportional reasoning to solve multistep ratio and percent problems (ex: simple interest, tax, markups, markdowns, gratuities, commissions, fees, percent increase and decrease or percent errors).

## "I Can" Do Math

(The Number System)
I can apply what I have learned about addition, subtraction, multiplication and division to fractions.
$\square$ 7.NS.A. 1 I can apply what I have learned about addition and subtraction to add and subtract rational numbers.
$\square$ 7.NS.A. 1 I can show addition and subtraction on a horizontal or vertical number line diagram.
$\square$ 7.NS.A.1A I can describe situations where opposite quantities combine to make 0 (ex: A hydrogen atom has 0 charge because its two constituents are oppositely charged.).
$\square$ 7.NS.A.1B I can demonstrate and explain how when adding two numbers $p+q$ : if $q$ is positive, the sum of $p$ and $q$ will be $|q|$ spaces to the right of $p$ on a number line; and if $q$ is negative, the sum of $p$ and $q$ will be $|q|$ spaces to the right of $p$ on a number line.
$\square$ 7.NS.A.1B I can explain and justify why the sum of $p+q$ is located a distance of $|q|$ in the positive or negative direction from $p$ on a number line.
$\square 7 . N S . A .1 C$ I can represent how the distance between two rational numbers on a number line is the absolute value of their difference and apply this to real-world situations.
$\square$ 7.NS.A.1C I can identify subtraction of rational numbers as adding the additive inverse property to subtract rational numbers, $p-q=p+(-q)$.
$\square$ 7.NS.A.1D I can use properties of operations as strategies to add and subtract rational numbers.

## "I Can" Do Math

(The Number System)
$\square$ 7.NS.A. 2 I can apply what I have learned about multiplication and division of fractions to multiply and divide rational numbers.
$\square$ 7.NS.A.2A I can recognize and describe the rules when multiplying signed numbers and apply the order of operations, particularly the distributive property, to multiply rational numbers (ex: $(-1)(-1)=1)$.
$\square$ 7.NS.A.2A I can use the products of rational numbers to describe real-world situations.
$\square$ 7.NS.A.2B I can explain why integers can be divided except when the divisor is 0 and describe why the quotient is always a rational number.
$\square 7 . N S . A .2 B$ I can understand and describe the rules when dividing signed numbers and integers and recognize that $-(p / q)=(-$
$p) / q=p /(-q)$.
$\square$ 7.NS.A.2B I can use the quotient of rational numbers to describe real-world situations.
$\square$ 7.NS.A.2C I can identify how properties of operations can be used to multiply and divide rational numbers (ex: distributive property, multiplicative inverse property, multiplicative identity, commutative property for multiplication and associative property for multiplication.)
$\square$ 7.NS.A.2D I can change a rational number to a decimal using long division and explain how the decimal form of a rational number stops in zeroes or repeats.

## "I Can" Do Math

(The Number System)
$\square$ 7.NS.A. 3 I can add, subtract, multiply and divide rational numbers.
$\square$ 7.NS.A. 3 I can solve real-world problems by adding, subtracting, multiplying and dividing rational numbers, including complex fractions.

## "I Can" Do Math

(Expressions \& Equations)
I can use properties of operations to create equivalent expressions.
$\square$ 7.EE.A. 1 I can apply properties of operations to add, subtract, factor and expand linear expressions with rational coefficients.
$\square$ 7.EE.A. 1 I can combine like terms to factor and expand linear expressions with rational coefficients using the distributive property.
$\square 7 . E E . A .2$ I can use properties of operations to write equivalent expressions.
$\square$ 7.EE.A. 2 I can rewrite an expression in a different form if needed.

## "I Can" Do Math

(Expressions \& Equations)

## I can solve real-world and mathematical problems using expressions and equations.

$\square$ 7.EE.B. 3 I can apply properties of operations to calculate numbers in any form and convert between numerical forms when necessary.
$\square$ 7.EE.B. 3 I can solve multi-step real-world and mathematical problems using positive and negative rational numbers in any form (whole numbers, fractions and decimals).
$\square$ 7.EE.B. 3 I can determine if an answer makes sense using mental computation and estimation strategies.
$\square$ 7.EE.B. 4 I can use variables to represent numbers in real-world or mathematical problems and make reasonable simple equations and inequalities to solve problems.
$\square$ 7.EE.B.4A I can identify and fluently solve equations in the form $p x+q=r$ and $p(x+q)=r$ (ex: The perimeter of a rectangle is 54 cm . Its length is 6 cm . What is its width?).
$\square$ 7.EE.B.4A I can compare an arithmetic solution to an algebraic solution.
$\square$ 7.EE.B.4B I can write and solve word problems leading to inequalities in the form $p x+q>r$ or $p x+q<r$.
$\square 7 . E E . B .4 B \quad I$ can graph and explain the solution of an inequality.

## "I Can" Do Math

(Geometry)
I can draw, construct and describe geometrical figures and describe the relationships between them.
$\square$ 7.G.A. 1 I can solve problems with scale drawings of geometric figures.
$\square$ 7.G.A. 1 I can figure out actual lengths and areas from a scale drawing and use them to create a different sized scaled drawing.
$\square$ 7.G.A. 2 I can draw geometric shapes with given conditions either freehand, with a ruler and protractor or with technology.
$\square$ 7.G.A. 2 I can recognize and draw a triangle when given three measurements: three side lengths, three angle measurements, or a combination of side lengths and angle measurements.
$\square$ 7.G.A. 3 I can draw and describe geometrical figures including right rectangular prisms and right rectangular pyramids.
$\square$ 7.G.A. 3 I can name the two-dimensional figures that represent a particular slice of a three-dimensional figure.

## "I Can" Do Math

(Geometry)
I can solve real-world and mathematical problems involving angle measure, area, surface area and volume.
$\square$ 7.G.B. 4 I can state the formulas for the area and circumference of a circle and use them to solve problems.
$\square$ 7.G.B. 4 I can explain the relationship between the circumference and the area of a circle.
$\square$ 7.G.B. 5 I can use properties of supplementary, complementary, vertical and adjacent angles in multi-step problems to write and solve simple equations for an unknown angle in a figure.
$\square$ 7.G.B. 6 I can solve problems involving area, volume and surface area of two-and three-dimensional figures.

## "I Can" Do Math

(Statistics \& Probability)
I can use random sampling to draw conclusions about a population.
$\square$ 7.SP.A. 1 I can understand that inferences about a population can be made by examining a sample.
$\square$ 7.SP.A. 1 I can understand why generalizations made about a population from a sample are only valid if the sample represents that population.
$\square$ 7.SP.A. 2 I can use data from a random sampling to draw conclusions about a population (ex: Estimate the mean word length in a book by randomly sampling words from the book.).
$\square$ 7.SP.A. 2 I can generate multiple samples to gauge predictions.
I can use data to compare two populations.
$\square$ 7.SP.B. 3 I can find similarities and differences in two different data sets (including mean, median, etc.)
$\square$ 7.SP.B. 4 I can compare and draw conclusions from two populations based off of their means, medians and/or ranges.

## I Can" Do Math

(Statistics \& Probability)

## I can develop, use and evaluate probability modes.

$\square$ 7.SP.C. 5 I can recognize and explain that the probability of a chance event is a number between 0 and 1 that expresses how likely an event is to occur (ex: When rolling a number cube 600 times, predict that a 3 or 6 would be rolled roughly 200 times, but probably not exactly 200 times.).
$\square$ 7.SP.C. 6 I can collect data to approximate probability.
$\square$ 7.SP.C. 6 I can use probability to predict the number of times an event will occur.
$\square$ 7.SP.C. 7 I can investigate, develop and use probabilities to help me solve problems.
$\square$ 7.SP. C. 7 I can compare probabilities to observed frequencies.
$\square$ 7.SP.C.7A I can develop a uniform probability model and use it to determine the probability of an event occurring.
$\square$ 7.SP.C.7B I can develop a probability model by observing frequencies in data developed from a chance process.
$\square$ 7.SP.C. 8 I can find probabilities of multiple events using organized lists, tables, tree diagrams and simulation.
$\square$ 7.SP.C.8A I can use the sample space to compare the number of favorable outcomes to the total number of outcomes and determine the probability of the compound event.
$\square$ 7.SP.C.8B I can explain the outcomes in the sample space that make up an event.
$\square$ 7.SP.C.8C I can design and use simulation to predict the probability of a compound event.
